Cellular

• *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in all photosynthetic organisms. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is essential for the light-dependent reactions of photosynthesis, where it converts light energy into chemical energy in the form of ATP and NADPH.

 No interest shall be charged on collections. This bank acts only as the
 postmaster collecting agent and assumes no responsibility beyond the clearing
 of the same. All items are subject to final payment to cash or
 other credits. This bank does not be liable for transit and each cor-
 respondent is advised accordingly. It is the policy of this bank to
 maintain its selected deposits in the bank for its own convenience.
 This bank or its correspondents may send items directly or indirectly to
 any bank including the payee's bank or to any other bank or bank
 department of any bank or other institution at any time before
 the items are cashed or otherwise disposed of by this bank.
 Notice: Deposits may not be available for immediate withdrawal.
